

# SACC *Service Academy Career Conference*

## Participating Without Slack

If your organization is unable to use Slack due to firewall or other restrictions, you can still participate in the Virtual SACC and connect with candidates. Here's how:

1. Make use of the resume book and candidate report to connect with candidates in advance.
2. Use the candidate report to send email blasts to candidates inviting them to connect with you.
3. Select an email address, VTC link or other form of contact that you and your team will be monitoring during the virtual SACC.
4. Send us that contact info along with a brief message to candidates.
5. This message and link will be added to your Slack channel. When candidates select your channel, the message will take them to your contact info. You will then be able to communicate with candidates in your selected platform.
6. Create an ad or a brief message inviting candidates to visit you. This message will be featured in the **#-main-lobby** throughout the day for all candidates to see.
